

Transfer Station Pit Scale Project Complete

Jefferson County Public Works successfully completed the replacement of the pit scales at the County's Transfer Station. These scales weigh municipal solid waste as it is loaded into containers for transport to the regional landfill. The old scales were 29 years old and could not be serviced anymore. The new scales are longer, making the operation more efficient. The project was completed ahead of schedule and on budget. 100% of project funding came from the fees charged for garbage disposal.

Thank you for your patience with congestion and delays during the project. The facility is back to normal operations as of November 22, 2022.

New Scales arrive Nov. 4th

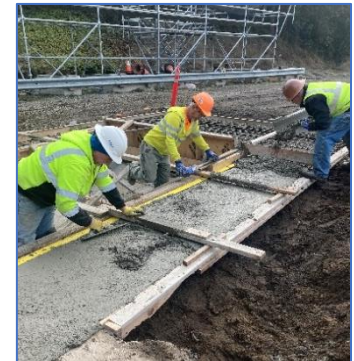

Old Scales removed

Cement forms constructed

1st Cement pour Nov. 8th

Finishing Cement work Nov. 9

Waiting for cement to cure Nov. 10

Scales lifted into new forms Nov. 11

Scales calibrated with 24,000 lb. cart

Project complete Nov. 21!
